INSTRUCTION SHEET FIRE OFFICER III PERFORMANCE SKILLS

Format

All of the Fire Officer III skills are contained in one skill sheet and are evaluated as a written project-based assessment and oral presentation. It is recommended that the project-based assessment skills initially be completed as assignments during the course. The Course Instructor may then review the assignments, provide feedback and recommend necessary changes. At the time of the scheduled TCFP performance skills evaluation, the final versions of the assignments for the project must be turned in for evaluation. The oral presentation should also be conducted at that time to evaluate the skills not included in the written project. It is recommended that the oral presentation skills be conducted in a role-playing format. The Course Instructor should specify time constraints as necessary.

Note: All of the Fire Officer III performance skills are to be evaluated. There will not be a random selection of skills for final testing as with most other TCFP performance skills evaluations.

Scoring Method

The scoring method is satisfactory (S) or unsatisfactory (U) for each grading criteria, and a Pass or Fail for the entire skill sheet. In order to successfully pass the Fire Officer III skills evaluation, the Fire Officer III candidate must receive satisfactory scores in all of the grading criteria. Any grading criteria marked unsatisfactory shall require the examiner to explain the reason for the failure in written form in the comments section of the skill sheet. The written project and the oral presentation will be evaluated independently. The candidate must retest only the failed component.

Preparation and Equipment

Many of the skills require the use of department policies. It is suggested that the Course Instructor use the policies and procedures from his/her department. If teaching this course at a non-departmental institution, acquire a fire department's policies and procedures, or modification thereof, to complete these skills. For optimal learning, scenario-based training and role-playing is recommended; however, based on departmental needs certain activities may be simulated by other means.
